Vodafone Dedicated Internet Overview

Sharing the public internet with everyone else can drag your business down, leading to slow speeds, low service reliability and poor cybersecurity.

Our dedicated internet service places you above these concerns, removes worries and allows everything to be 'business as usual.' We bring the bandwidth, speed and reliability you need to manage your online assets and communicate without barriers. Websites, intranets, extranets, and application performance is optimised, and there are number of security options to keep everything safe.

We offer a managed and maintained service so you can focus on your core business – we take care of the rest.

Features of Dedicated Internet

Key Features:

An uncontended service -

Dedicated circuits that provide high-speed, always-on and uncontended internet access allowing you to get 100% of the bandwidth you are paying for.

The speed you need -

Choose the connection speed that suits your business today, with the opportunity to scale up and a burst option that provides extra bandwidth to meet unexpected peaks in demand.

Keep your connection and data safe -

with network security features including Distributed Denial of Service (DDoS) protection, internet proxy services, email security, managed firewalls and resilient service options.

Confidently connected -

Business-critical applications stay connected thanks to 24/7 support and service monitoring spotting problems before they start.

Unlimited access -

There are no restrictions on monthly usage, making it ideal for hosting your own website, managing email efficiency or supporting business-critical applications.

Dual Peering-

Two Diverse paths connecting to two different geographic locations, connecting multiple upstream providers.

Our Redundancy and Diversity Architecture

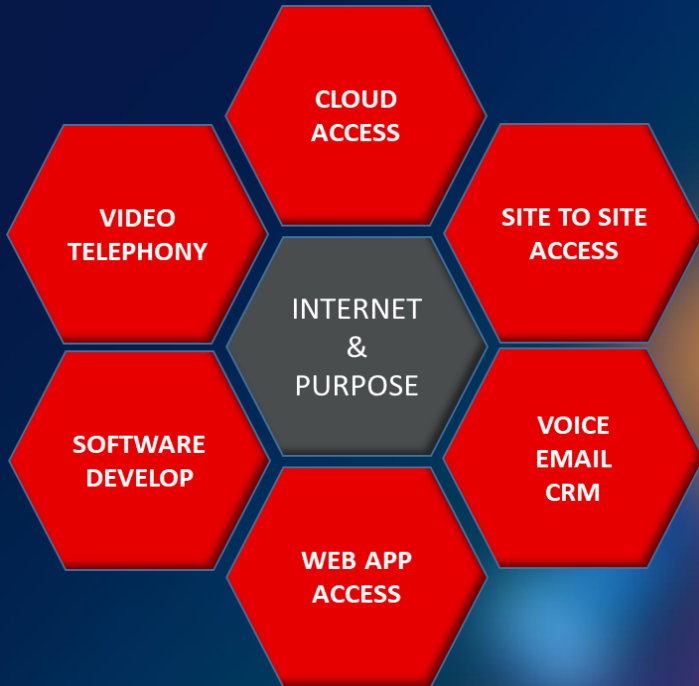

■ Reliability & Diversity

- Dual peering
- Diversity routes
- Scalable
